What are you waiting for?

Do frogs pile up in your pool skimmer when it rains? Not if you have a Critter Skimmer. Every pool needs a Critter Skimmer!

- Environmentally friendly
- Simple and effective
- Cleaner pool without additional chemicals
- Frogs save themselves without any human intervention
- No interference with normal skimmer action

CRITTER SKIMMER

Approved by Frogs and Toads Everywhere

The Critter Skimmer Story

29 frogs can't be wrong! I love frogs and I don't want them to die needlessly in pool skimmers. So one day in the summer of 2007, the Critter Skimmer was born! Day after day, frogs hopped to safety. Great! Until the day I took the Critter Skimmer out and forgot to put it back.

The next morning, 29 frogs were waiting in the skimmer basket with no means of escape.

The Critter Skimmer is a spiral rescue ramp that is attached to a skimmer cover allowing critters to climb out on their own before drowning in the water flow through the pool skimmer. The Critter Skimmer is simple, effective, and best of all—it really works!

CRITTER SKIMMER
WE CREATE THE OPPORTUNITY. NATURE DOES THE REST.

Every pool needs a Critter Skimmer!

Finally, there is an environmentally safe way to save the frogs and small critters that inevitably make their way into the in-ground pool skimmer!

Simply replace your existing skimmer cover with the Critter Skimmer and walk away. Pool skimmer functionality is not impacted.

CRITTER SKIMMER

WE CREATE THE OPPORTUNITY. NATURE DOES THE REST

Every pool needs a Critter Skimmer!

Finally, there is an **environmentally** safe way to save the frogs and small critters that inevitably make their way into the in-ground pool skimmer!

Simply replace your existing skimmer cover with the Critter Skimmer and walk away. Pool skimmer functionality is not impacted.

Critter Skimmer: We Create the Opportunity. Nature Does the Rest!

Save the Frogs

It's inevitable. Frogs and other critters find their way into in-ground pools and end up in the pool skimmer. Until now, pool owners had to regularly empty their skimmer baskets to dispose of the drowned frogs.

Critter Skimmer is a revolutionary new way of solving this problem. Small critters can rescue themselves by climbing up the spiral rescue ramp and out the skimmer cover to safety.

The Critter Skimmer consists of two parts—the skimmer cover and the detachable spiral rescue ramp. Frogs hop up the ramp to safety.

CRITTER SKIMMER

Earth Tones - New for 2010

Simple and Effective

This is the **ONLY** product available that utilizes the current of the water flowing through the skimmer and directs the frogs onto the Critter Skimmer ramp. As stated in our company motto: "We Create the Opportunity. Nature Does the Rest".

Frogs and small critters climb up the spiral rescue ramp to safety. You may never know they were there unless you see them hopping away!

Choose Your Shape

Based on the shape of your skimmer cover you simply pick the 9 inch **Round**, 10 inch **Round**, or 10 inch **Square** design. Critter Skimmers are available in standard white, earth-tone gray, and earth-tone tan. Replaces: Hayward, Waterway, Pentair, Pacfab, Swimquip, Sta-rite, American, etc.
