

Get a

SUSTAIN

Brain

1. Add Summer Shield every 5 months. Shields chlorine and releases it on demand.

Summer Shield is the brain of the system. If the chlorine level should drop suddenly following a rainstorm, or some other unforeseen occurrence, your pool is temporarily protected.

Summer Shield works like a chemical sponge soaking up excess chlorine that results during routine shocking and is usually lost. The excess is then shielded and is only squeezed out when needed. One application lasts 150 days.

one quart per 10,000 gal each season

2. Use Sustain 3" Tabs once a week. Sustain-brand chlorine.

Sustain calcium hypochlorite tabs contain 65% available chlorine. They deliver uniform, controlled, consistent chlorination because of a patented erosion modifier.

one tablet per 10,000 gal weekly

3. Toss in Energizer Tabs once a week. Boosts the effects of Summer Shield.

Energizer tabs are designed for double duty:

- a. Recharge chlorine in Summer Shield
- b. Provide routine shocking power.

one capful (8 oz) per 5,000 gal weekly

SMART & EASY!

Starting with Sustain

It's easy to get the season off to a great start. Follow your pool professional's directions for balancing and stabilizing your pool water and reaching a level of 1 to 3 ppm free available chlorine. Following the label directions, add Sustain Summer Shield, Sustain chlorine tablets, and

The Chlorine System with
a BRAIN!

Energizer Tablets. Now the pool is open and your protection is ready for the season.

Ending with Sustain

At the end of the season, balance the water. Then, use Sustain Winter Shield to help maintain chlorine protection against algae all winter.

100% algae-free guarantee

The results are brilliant: clean, clear, sparkling, 100% algae-free water all season long. If you ever have an algae problem, Memphis Pool will provide you with the chemicals to solve the problem ... FREE OF CHARGE. *

*Assuming appropriate levels of Sustain have been maintained. Have your water checked at a Memphis Pool Water Care Lab every 4-6 weeks. Sustain is not to be used in conjunction with a chlorinator or mixed with stabilized chlorine.
